

## Shooter Kills Three at Manufacturing Plant in U.S. State of Kansas

Wichita, February 26 (RHC)-- In the U.S. state of Kansas, a man killed three people at a manufacturing plant Thursday in a shooting spree that also left 14 people wounded.

Authorities say suspected shooter Cedric Ford drove around firing on people on his way to his work place, Excel Industries. The shooter was killed by police.

This latest shooting incident comes less than a week after six people were killed and two injured in Michigan when an Uber driver went on a four-hour-long shooting rampage, opening fire on people seemingly at random.
