

Report Says Canada's \$3.3 Billion in Oil & Gas Subsidies Undermines Climate Action

Ottawa, November 17 (RHC)-- A new report by Canadian environmental groups says annual government subsidies of \$3.3 billion to oil and gas companies undermine Canadian Prime Minister Justin Trudeau's plans to impose a price on carbon dioxide emissions by 2018.

Oil Change International said: "This system is like taxing consumers when they buy cigarettes while giving massive tax breaks to tobacco companies that encourage them to produce more cigarettes. It doesn't make sense."
