

Yemen Officials Say U.S.-Backed Saudi Airstrike Killed 25 Civilians in Market

Sanaa, June 23 (RHC)-- In Yemen, health officials say multiple U.S.-backed, Saudi-led coalition airstrikes killed at least 25 civilians at a market in northern Saada province. Graphic images that circulated on social media show corpses lying amid rubble and survivors surveying the damage to the market.

More than 10,000 people have died amid the ongoing U.S.-backed, Saudi-led war in Yemen, which has also destroyed the country's health, water and sanitation systems, sparking a deadly cholera outbreak.
