

Thousands of Government Supporters Reject Foreign Interference in Iran

Teheran, January 8 (RHC)-- For the sixth consecutive day thousands of government supporters took to the streets in several cities in Iran to reject violent protests and foreign interference, while taking the opportunity to reaffirm their support for the Islamic Revolution.

Slogans against the United States, Israel and Saudi Arabia - countries the Iranian Government blames for the violent acts – were seen again on Monday.

Iran accused the US of meddling in its affairs after Donald Trump's tweet offering support to the violent protesters.

With posters of the supreme Iranian leader the demonstrators rejected the external interference and demanded respect for their self-determination.
