

Latin American and European Pediatricians Hold Conference in Cuba

Havana, January 19 (RHC-PL)-- Latin American and European pediatricians will participate in the 28th Pediatrics Conference that begins on January 24, dedicated to the 90th anniversary of the Cuban Society of Pediatrics, according to the organizers.

Around 400 national and foreign representatives, including a U.S. delegation and colleagues from Qatar, will also participate in the event, which runs through January 26th at Havana's Convention Center, the Palacio de Convenciones.

The president of the organizing committee, Gladys Abreu, said the forum would be held at a time when Cuba has recorded its lowest infant mortality rate in Cuban history at 4 per 1,000 live births.

She highlighted that the event, besides presenting the results that led to this achievement, will show how the Cuban specialists would continue and maintain those results.
