

Cuba denounces U.S. blockade as main obstacle to the country's development

Geneva, April 29 (RHC)-- Cuba denounced again on Monday that the blockade policy constitutes the main obstacle to the country's development.

Cuban ambassador in Geneva Pedro Luis Pedroso addressed the 20th session of the Intergovernmental Working Group on the Right to Development.

He said: "This genocidal policy (U.S. blockade), maintained by consecutive U.S. administrations against the Caribbean state for nearly sixty years, constitutes a flagrant violation of the human rights of the entire Cuban people."
