

ExxonMobil goes on trial in New York over climate change

New York, October 22 (RHC)-- In New York, ExxonMobil is on trial over accusations it deceived shareholders over the financial risks of climate change.

In 2015, a damning report by InsideClimate News and the Los Angeles Times revealed that Exxon knew that fossil fuels contributed to climate change as early as the 1970s, but did not take any action even as it covered up the science.
