

South Africa COVID-19 cases cross 300,000

Pretoria, July 18 (RHC)-- South Africa's coronavirus cases of crossed 300,000, the most in Africa and amongst the top 10 in the world.

Africa's most industrialised nation recorded a rise of 12,757 cases on Wednesday to reach 311,049 confirmed COVID-19 cases, its health ministry said in a late evening statement, a little over four months since the first case was confirmed in the country.

It has tested 2,278,127 people so far and has seen a total of 160,693 recoveries and 4,453 deaths, the statement said.
