

France reports 2,551 new COVID-19 cases over last three days

Paris, July 28 (RHC)-- France has reported 2,551 new confirmed cases over the last three days, the country's health department said, which means a daily average of 850 over that period.

That is slightly lower than the 1,000-plus figure published on Thursday and Friday but higher than the 677 daily average seen since the beginning of the month.
