

Madrid tightens coronavirus restrictions

Madrid, July 29 (RHC)-- The Madrid regional government is making the wearing of face masks mandatory in all public areas, limiting how many people can gather in one place and targeting young people in a drive to stamp out new outbreaks of the coronavirus.

Regional government head Isabel Diaz Ayuso announced that no more than 10 people can be present at private gatherings.

Ayuso also said an information campaign will focus on young people, who are largely blamed for spreading the coronavirus through their social life. She said young people "have it in their hands to reverse the trend."
