

Bolivia surpasses 100,000 cases, authorities predict September peak

La Paz, August 18 (RHC)-- Bolivia has surpassed 100,000 coronavirus cases, according to the country's Ministry of Health, predicting that the virus would reach its peak in Bolivia in September.

Bolivia's confirmed coronavirus infections reached 100,344, the ministry said, and there have been 4,058 deaths since the virus first emerged in the country in early March.
