

Hurricane Iota slams into Nicaragua as extremely dangerous Category 4 storm

Hurricane Iota hits Nicaragua as Category 4.

Managua, November 17 (RHC)-- Hurricane Iota made landfall Monday afternoon on Nicaragua's Caribbean Coast as an extremely dangerous Category 4 storm. Much of the city of Puerto Cabezas has been left without power, with the roofs of homes and a makeshift hospital ripped off by heavy winds and

rain.

Iota is the strongest hurricane ever observed this late in the season. It hit Central America just days after Hurricane Eta devastated communities across the region, killing at least 150 people and leaving hundreds of thousands homeless.
