Cuba confirms the highest number of Covid-19 cases in pandemic

RHC

Havana, June 27 (RHC)-- Cuba confirmed on Sunday 2,698 new cases of the SARS-CoV-2 coronavirus, the pathogen that causes Covid-19, which represents the highest number in one day during the entire pandemic since 2020.

For the third consecutive day, the country reported more than 2,000 cases and this shows the complex situation that the territory is experiencing, said the national chief of Epidemiology, Francisco Durán.

With this 182,354 people who have suffered from Covid-19 since March 11, 2020.

Durán detailed that the most complicated situation is in the autochthonous transmission.

He also regretted the death of 10 people, bringing the number of deaths to 1,241.

June has become the most complex month of the pandemic, since in 26 days 39,31 patients with Covid-19 and 276 deaths were reported, for an average of 1,501 cases per day and 11 deaths.

Referring to the progress of the immunization process with the country's vaccine candidates, Soberana 02 and Abdala, the expert informed that five 492,355 doses of these products had been administered as of

The data include the different modalities applied, such as clinical trials, intervention studies, and health interventions.
