

Cuba reports 3 075 new cases, 21 deaths

RHC

Havana, July 5 (RHC)—Cuban health authorities reported on Monday 3 705 new COVID-19 infections and 21 deaths associated with the disease.

The National Director of Epidemiology, Dr. Francisco Duran Garcia, said that 19 113 confirmed patients with the virus were hospitalized, and 3261 people were discharged.

Cuba now totals 207 322 people diagnosed with the disease and 1372 fatalities since the beginning of the pandemic.

The territories with the most infections reported were Matanzas with 795, Havana 485, Santiago de Cuba 300, and Camaguey with 229 cases.

Meanwhile, six million 675 thousand 661 doses of Cuban vaccine candidates against Covid-19 were administered as of July 3.

Two million 869 thousand 501 people received at least one dose of one of the Cuban vaccine candidates; two million 196 thousand 863 people have already received a second dose, and one million 609 thousand 454 are fully vaccinated.
