

U.S. launches second drone strike in Somalia in less than a week

Mogadishu, July 26 (RHC)-- The U.S. military has launched its second drone strike in Somalia in under a week. It was also the second attack targeting al-Shabab fighters in Somalia since U.S. President Joe Biden took office. ?

Mogadishu, July 26 (RHC)-- The U.S. military has launched its second drone strike in Somalia in under a week. It was also the second attack targeting al-Shabab fighters in Somalia since U.S. President Joe Biden took office.

Minnesota Congressmember Ilhan Omar, whose family came to the U.S. as Somali refugees, wrote a letter to Biden requesting more information about the strikes. She said: "It is critical that any military action must be part of a broader strategy focused on the security of the Somali people and the stability of the Somali state."
