

Cuba is ready to produce millions of anti-Covid-19 doses

pl

Havana, August 28 (RHC)-- The Center for Molecular Immunology (CIM) reported that it is ready to produce 10 million doses of the anti-Covid-19 Soberana 02 and Soberana Plus vaccines, local press reported Saturday.

According to the Center - quoted by Granma newspaper - it has the Active Pharmaceutical Ingredient (API) ready to produce these immunogens against Covid-19.

'The work team producing the RBD MPA reaches the first 10 million equivalent doses of the Soberana 02 and Soberana Plus vaccines. All this has taken place in just one month of intense work at the Antibody Plant', stressed a message from this scientific institution.

In recent days, the Center for State Control of Medicines, Equipment and Medical Devices (CECMED) approved the request for the Emergency Use Authorization of Soberana 02 and Soberana Plus in its

combined vaccination scheme (two doses of Soberana 02 plus a booster dose of Soberana Plus).

Both are in addition to Abdala, the first Cuban and Latin American vaccine against Covid-19.
