

Guantánamo prisoner who survived torture for more than 20 years cleared for release

Washington, July 23 (RHC)-- The Joe Biden administration has cleared another prisoner for release from the U.S. military prison at Guantánamo Bay, at the illegally occupied naval base in eastern Cuba.

The United States has imprisoned Khalid Ahmed Qasim of Yemen at Guantánamo since May of 2002 without charge or trial. The human rights group Reprieve says he was severely tortured at Guantánamo — forced to sleep standing up, subjected to freezing temperatures and left shackled and unable to walk for long stretches.

The United States continues to imprison 37 people at Guantánamo. Twenty of those remaining have been recommended for transfer.
