

Multinational Doctors Slam Israeli War on Gaza

Gaza City, July 28 (RHC)-- A multinational group of doctors have written an open letter denouncing the Israeli war and crippling siege on the Gaza Strip. The doctors have voiced their opposition to the relentless onslaught in the blockaded enclave, describing the war on Gaza “a ruthless assault of unlimited duration, extent and intensity.”

The group says the Israeli war on Gaza has a direct implication on ordinary civilians who are losing their lives and bearing the brunt. “The massacre in Gaza spares no one,” the doctors said in the letter.

According to the doctors, the Israeli war on Gaza terrifies people and wounds the soul, mind, and body of the young generation. The group also says that the Israelis are “demolishing their homes.”

They also condemned the Israeli siege on Gaza, saying it has added to the suffering of ordinary civilians who are living under dire circumstances without being able to receive external help.
