

Israeli tanks move near Gaza fence as ground invasion looms

Image not found or type unknown

Gaza City, October 15 (RHC)-- Israeli tanks have begun positioning themselves on the border fence with Gaza as the military build-up continues amid relentless bombardment of the besieged Palestinian enclave.

Tens of thousands of Palestinians have been displaced after Israel ordered 1.1 million residents of northern Gaza to evacuate to the south amid a looming ground offensive.

Meanwhile, the Israel-Lebanon border could become a new battle front if Tel Aviv's genocidal war on Gaza escalates. Tit-for-tat retaliations continue between Israel and the Lebanese armed group Hezbollah, along the Israel-Lebanon border.

According to media sources, everything going on at the Lebanese border is linked to what's happening in Gaza. This front could be the most concerning front for Israel concerning the quality of weapons used by Hezbollah. The group has also engaged in many wars and has been stockpiling tens of thousands of

rockets which could be used in its self-defense.
