

United Nations Palestine observer slams Olaf Scholz's defense of Israel

United Nations, November 16 (RHC)-- The deputy permanent observer for Palestine to the United Nations has responded to recent comments by German Chancellor Olaf Scholz, who said Israel is a democracy that respects international law and human rights.

Majed Bamyia wrote on social media: "I am now convinced there is another international law that we don't know about and that the German chancellor and others are referring to, one that allows colonisation, collective punishment, indiscriminate attacks, wanton destruction, racial discrimination as long as your name is Israel."
