

Israeli forces prevent medics from reaching two Palestinians bleeding to death in occupied West Bank

Ramallah, December 19 (RHC)-- In the occupied West Bank, Israeli soldiers shot and killed two Palestinians near the town of Sofin Tuesday. They were identified as 32-year-old Mohammed Ashqar and 31-year-old Diaa Salmi.

Israeli forces reportedly blocked anyone from approaching the wounded men, leaving them to bleed out before medical help could arrive.

Israel has carried out near-daily raids across the occupied West Bank, killing at least 800 Palestinians since October 2023 and arresting over 12,000.
