

Power restoration progresses in Havana

Havana, March 16 (RHC)-- The Havana Electric Company reported this Sunday, through its official Telegram channel, that power has been restored in the areas of Boyeros, Guanabacoa, Centro Habana, Marianao, Cerro, 10 de Octubre, La Lisa, Playa, San Miguel del Padrón, and Arroyo Naranjo.

This progress represents coverage for a demand of 68 MW, equivalent to approximately 19% of the capital's customers.

Work continues uninterrupted from the Provincial Load Dispatch, with the goal of extending power service to the entire city.

In addition, the company maintains its official accounts on X, Telegram and Facebook available to the public for constant updates, as well as the Telephone Service Center, available 24 hours a day through the number 18888.
