

United Nations warns that world is watching as another week of horror passes in Gaza

United Nations, April 17 (RHC)-- The UN Office for the Coordination of Humanitarian Affairs (OCHA) has warned that the atrocities being committed daily in Gaza cannot become “normalized” as they unfold while the “world is watching.”

Listing the events in another “week of horror” in Gaza, OCHA offers a summary including that four attacks on humanitarian aid convoys by looters took place over three days; a UN-run fuel station was destroyed in an attack; how Israel forces gave just a 20-minute deadline for the forced evacuation of an entire hospital, which led to the death of a child.

The UN agency says that “day after day” civilians are killed, hospitals attacked, no aid has entered the war-torn territory in weeks, and families are “shattered.”

“This must stop. This must not be normalised,” OCHA said.
