

Israeli attacks on Gaza's hospitals destroy already scarce supplies

Gaza City, May 21 (RHC)-- Israeli strikes on Gaza's hospitals continue and intensify. The World Health Organization has condemned an attack on Nasser Hospital which destroyed one-third of a medical supplies warehouse.

Nasser Hospital's director, Dr. Atef Al-Hout, said: "We now have nearly 30 patients in the intensive care unit, and I have seven patients who need intensive care in the emergency room that I can't find space for."

Until when will this silence continue? Until when will the Security Council stand idly by? Until when will the United Nations, the European Union and other institutions stand watching this situation?"
