

*As bird flu spreads throughout the United States, government health agency cancels \$600 million contract to develop influenza vaccines*

---

Washington, May 31 (RHC)-- A major report on chronic health conditions by Health Secretary Robert F. Kennedy Jr. was found to contain citations to nonexistent studies.

According to the outlet NOTUS, the 73-page “Make America Healthy Again” document contains references to at least seven fabricated studies, while other studies are misinterpreted.

This comes as the Health Department has just canceled a \$600 million contract with Moderna to develop mRNA vaccines protecting against flu subtypes which could develop into pandemics, including bird flu.

RFK Jr. has expressed skepticism over mRNA technology, which was used in COVID vaccines that are widely credited with saving millions of lives and preventing millions of cases of severe disease.
