

Yemeni ballistic missile hits Israel's Ben Gurion airport

The Yemeni armed forces carried out another anti-Israel operation on Monday morning, targeting the regime's Ben Gurion Airport with a hypersonic missile.

Sanaa, June 2 (RHC)-- The Yemeni army says it has launched fresh retaliatory operations against Israeli targets deep inside the occupied Palestinian territories in response to the ongoing aggression against the

people of Gaza.

The Yemeni Armed Forces said in a statement on Monday morning that the missile force of the Yemeni Armed Forces carried out a specific military operation targeting Ben Gurion airport in the occupied area of Yaffa using a hypersonic ballistic missile.

The operation successfully achieved its objective, causing millions of herds of usurping Zionists to flee to shelters and halting airport operations. The UAV force of the Yemeni Armed Forces carried out three military operations targeting three vital Israeli enemy targets in the areas of Yaffa, Ashdod, and Umm al-Rashrash in the occupied Palestine using three drones, the statement said.

The Yemeni Armed Forces also said they are working to impose a complete ban on air traffic at Ben Gurion airport. They said the remaining airlines that have not yet complied with the ban should take this into consideration to preserve the safety of their aircraft and customers.

“Our operations, with trust in Allah and reliance on Allah, will not cease until the aggression against our steadfast people in the Gaza Strip stops and the siege on them is lifted,” they stated.

Meanwhile, Yemen’s President and Supreme Commander of the Armed Forces warned all companies investing in the occupied Palestine to take the warning seriously and leave as quickly as they can.

Mahdi Al-Mashat said companies that remain in the occupied land after the Yemeni warning must bear the consequences of their insistence and assume responsibility for any losses they may suffer. “We may take additional decisions in the coming days, if necessary, that will expose investment companies within the Zionist entity to real and significant risks,” Mashat said.

“Ignoring our forces’ warnings will turn the work of some investment companies inside the entity into a dangerous gamble, for which they may bear heavy costs as a result of their continued presence,” he said.

“We will direct the concerned authorities to set a time limit for these companies to leave, out of our keenness to limit the damage to the Zionist entity’s government as much as possible and prevent it from dragging others into this harm,” the president said.

As the genocidal war on Gaza escalated, the Yemenis enforced a strategic blockade on essential maritime routes, intending to obstruct the delivery of military supplies to Israel and urge the international community to take action regarding the ongoing humanitarian emergency in Gaza.

The Yemeni Armed Forces have declared they will not stop their assaults unless Israel ceases its ground and aerial offensives in Gaza.
