

Israel resumes attacks on Syrian military infrastructure with Daraa airstrikes

Damascus, June 5 (RHC)-- Syrian officials have condemned Israeli airstrikes on the Syrian province of Daraa, which they say caused “heavy human and material losses.”

Israel launched the strikes Tuesday after officials said they tracked two projectiles fired from Syria into open ground in the Israeli-occupied Golan Heights.

After the fall of Bashar al-Assad in December, Israel waged a monthslong campaign of airstrikes that destroyed much of Syria's military infrastructure.
