

Indonesian Rescuers Find Bodies, Debris from AirAsia Flight

Kuala Lumpur, December 30 (RHC)-- Indonesian rescuers have found dozens of bodies and debris from a passenger plane that was carrying 162 people when it disappeared on the way to Singapore Sunday.

The remains were found in the Karimata Strait off the coast of Borneo. AirAsia Flight 8501 had requested permission to climb to a higher altitude amidst bad weather, but the response was delayed due to heavy air traffic, and the plane disappeared.
