

French Medical Staff Protest against Working Hours Reforms

Paris, May 29 (RHC)-- French medical staff have staged a demonstration to voice their anger at the Socialist government's planned changes in their working hours, saying the reforms will cause more burnout for workers and poor patient care.

On Thursday, thousands of French doctors, nurses, and other hospital personnel gathered outside the headquarters of Paris' regional hospital authority that oversees 38 hospitals as well as 95,000 employees.
