Computer Problems Ground American Airlines Flights in the United States

Dallas, September 18 (RHC)-- In the United States, American Airlines flights from Miami, Dallas and Chicago were grounded Thursday because of computer problems.

According to the U.S. Federal Aviation Administration, the FAA, the airline reportedly tweeted to customers who had been complaining about being grounded, telling them that they were trying to resolve the issues as quickly as possible.

An FAA spokeswoman said that the airline has requested to hold departures at the Miami, Dallas/Fort-Worth and Chicago's O'Hare airports.
