

Venezuela Denounces Revival of US Threats

Caracas, October 31 (RHC-PL), -- The denunciation, by its government and the Bolivarian Revolution, of the US revival of aggressive campaigns and conspiracies against Venezuela marked the end of the week in the country.

President of the Republic, Nicolas Maduro yesterday condemned 29 claims by US General John Kelly, head of the Southern Command, which allude to a situation of deprivation in Venezuelan families, and a willingness to intervene militarily in the country if necessary.

Maduro said that the objective of the northern nation is to seize the resources of Venezuela and submit it to international economic powers with the help of the local right.
