

Doctors Without Borders Identifies 14 Staff Killed in U.S. Strike

Kabul, November 25 (RHC)-- Doctors Without Borders has identified 14 staff members killed in a U.S. airstrike on its hospital in Kunduz, Afghanistan on October 3rd.

In a statement, Doctors Without Borders said the hospital was hit by "precise and repeated airstrikes for more than an hour. Even as the attack continued, our colleagues fought for their lives and for the lives of their patients with extraordinary determination and courage."
