

Ecuadorian Parliament Begins Debates on Labor Reforms

Quito, Feb 24 (RHC) The National Assembly of Ecuador began Tuesday arrangements to submit to debate a package of labor reforms, an Executive proposal to protect employment in the country.

Legislative sources said the Parliament Management Council met Tuesday, at the request of Congress President Gabriela Rivadeneira, to study the bill the government sent marked as urgent, giving the Legislators 30 days to respond.

The government wants to limit the work week to 40 hours, promote young people's access to work, and link University students to private enterprise, through internships.
