

President Rousseff Expresses Willingness to Hold Dialogue to Rein Political Unrest in Brazil

Brasilia, April 6 (RHC) Brazilian President, Dilma Rousseff, has confirmed her government's decision to end, through dialogue, the current political unrest, that is hurting the country and democracy.

President Rousseff reminds that an entire generation fought to conquer democracy, whose absence would cripple stability, economic growth, rob chances to provide education and create job opportunities.

Rousseff said that, from the beginning of her second term in office, the opposition has tried by all means to slash her constitutional mandate, and insists on evicting the winner of the elections.
