

Ecuadorian President Rafael Correa Warns About Dirty Opposition Campaign

Quito, February 17 (RHC)-- Ecuadorean President Rafael Correa warned that the right-wing has implemented a dirty campaign to create a violent situation.

He talked about false e-mails and phone calls about the alleged debt to the tax administration and the strategy of the opposition to deny the development of Quito under the administration of *Alianza Pais*.

He highlighted the different works that have been implemented, like the metro and building a new highway to the international airport and urged the people from Quito to challenge those who offend their country.

Correa, who has been supporting the candidates of Alianza Pais in the electoral campaign, warned that the victory of the opposition would endanger all the achievements of his administration which has been power for seven years ago.
