

Death Toll in Sinai Mosque Attack Now 305

Cairo, November 25 (RHC-Agencies)-- Egypt on Saturday said an attack on a mosque by militants in the country's troubled region of northern Sinai has killed 305 worshippers, including 27 children, a dramatic increase in the death toll of 235 previously announced.

A statement by the country's chief prosecutor, Nabil Sadeq, said the attack Friday left another 128 people wounded.

It said the attackers, estimated at between 25 and 30 in number, arrived at the mosque close to the small town of Bir al-Abd in five all-terrain vehicles and positioned themselves at the main door and the facility's 12 windows before opening fire. They also torched seven cars parked outside the mosque, which belonged to worshippers inside.

Quoting testimonies given to investigators by survivors, the statement said some of the attackers were masked. Those who were not sported heavy beards and long hair. The militants wore camouflaged pants and black T-shirts, it added.

Friday's attack is the deadliest by Islamic extremists in Egypt's modern history.
