Cubans and Canadians fill container in tsunami against the blockade

Havana, April 11 (RHC) - The association of Cubans living in Toronto Juan Gualberto Gómez and Canadian associations filled a container with medical supplies for the island, an initiative framed today in the campaign of the channel Europe for Cuba "World Tsunami against the blockade".

The channel published on social networks a video-message made the day before, after finishing the solidarity work, in which the organizations Not Just Tourist and the Cuba-Canada Friendship Association participated.

Julio Fonseca, president of the association of Cuban residents in Toronto, highlighted the initiative of Europe for Cuba launched last week, with the aim of carrying out actions that go from one country to another and from one continent to another against the economic, commercial and financial siege imposed by Washington on Cuba for more than six decades.

The associations, personalities and individuals that join will develop from street actions to statements and complaints on social networks against the blockade applied to Cuba, they detailed.

In this sense, they explained that each organization is responsible for preparing its activity, depending on its characteristics and possibilities, with the intention of achieving a global reaction against the US siege, which passes through America, Africa, Europe and Asia. (Source: Prensa Latina)
