London, April 18 (RHC)-- In Britain, police arrested two people as they held a protest on the roof of a factory that supplies hardware to Israel's biggest weapons producer, Elbit Systems.

The activists reportedly sabotaged parts inside the GRiD Defence Systems factory before climbing to the rooftop and unfurling a banner reading "GRiD and Elbit — Blood on Your Hands."

One Palestine Action activist told reporters: "We are just regular people who oppose genocide, who oppose companies on U.K. land selling weapons that are used to kill children. In the past month alone, we have seen babies with no heads, children's bodies blown apart. We cannot stand back and just do nothing."
